

Coastal Urbanism

Susannah Drake

Founder of DLANDstudio and Associate Professor at the University of Colorado Boulder

"From the scale of the individual to larger communities, people will be making the difficult decision to leave their homes, neighborhoods and native lands, in order to survive the impacts of climate change. Where will they go? What will they do? How will they transition? These are among the questions being asked as countries react to depopulation, adaptation, and the increasing flow of people across political borders. With the coming climate exodus, can the mass migration of people be used as a catalyst for positive change for urbanity on higher ground? We believe it can and are designing a better future for that reality."

INVITATION TO INSPIRATION WEBINAR

It is with great pleasure that we invite to the first in a series of webinars which focus on cities and rising sea levels. From different perspectives and based on Danish as well as international research and experiences the webinars will address challenges and solutions. It is free to join.

Thursday 17 September 2020 at 16.00-17.00

Registration: No later than 14 September 2020 to Kamilla Møller email: kahm@ign.ku.dk

Language: English. Platform: Zoom. Link will be sent by email before the webinar.
